

305m Cat5e Low Smoke Zero Halogen (LSZH) Bulk Solid Cable

Cat5e cable made with Low Smoke Zero Halogen material

Our Cables To Go LSZH high performance cable is designed for fast Ethernet and gigabit computer networks that require enhanced Category 5 cabling for voice/data/video distribution. This cable will handle bandwidth-intensive applications up to 350MHz, meets all CAT5e ANSI/TIA, ISO/IEC and CENELEC EN standards, and drastically reduces both impedance and structural return loss (SRL) when compared to standard 100MHz wire. This bulk cable comes in a 305m pull box for quick dispensing.

This cable is perfect for installation in public areas, factories, transport systems and any other area where excellent fire safety characteristics are needed. The zero halogen jacket gives off less smoke and emits fewer corrosive gases making it the perfect cable when protecting people and equipment from harmful gases is essential.

Features:

- Perfect for installation in:
 - Office environments
 - Data centres
 - Factories
 - Ventilation systems
 - Public areas
- Meets all Category 5e standards
- Manufactured in a pull box for ease of use
- Low Smoke Zero Halogen jacket means the cable will release fewer hazardous gases in the event of a fire
- Lifetime warranty
